For Nurserymen, Florists and Landscapers

## IMPORTANT TO THE TRADE

**OUR BUSINESS**—The Sherwood Nursery Co. are propagators and growers of evergreen trees and shrubs, specializing in the production of conifers and broad leaved evergreens. We have put into this business the skill and experience of expert nurserymen, and own and operate the most efficient propagating plant in the United States devoted exclusively to the propagation of evergreens.

**SOIL AND CLIMATE**—This skill and experience, coupled with a soil and climate that cannot be excelled for the growing of plants, has resulted in a product that is sure to please. Our soil is just right, free from peat, producing a fine vigorous root system, making a plant that is easy to move. The soil and climatic conditions combine in the larger plants to produce a wealth and luxuriance of foliage that cannot be surpassed. Most seasons plants can be dug and shipped from our nursery every month of the year except July and August.

**QUALITY OF STOCK**—The Sherwood Nursery Co. stands back of all stock sold. A constantly increasing list of satisfied customers testifies to the quality of our stock and business methods. While no guarantee is given, many of our plants will withstand any reasonable degree of cold and all have been tested to a temperature of at least zero weather under certain conditions.

All stock offered in this list is our own production.

**LOCATION**—Our nurseries are located at Portland, Oregon, at the foot of the Cascade Mountains, with the snowy peaks of Mt. Hood and St. Helens plainly visible from our office windows, and where nature has made conditions favorable for plant production. Favored as we are, we can compete in price and quality with plants grown anywhere. Portland is one of the leading truck and railroad centers of the Pacific coast, reached by main lines north, east, south, and west, with water grade transportation up the Columbia River eastward. Car lots can be shipped to the Atlantic coast in 10 days so that there is no danger of loss of plants.

Visitors are always welcome. If at all possible come and see our stock. It speaks for itself.

*We contract to propagate in our lines. If interested write for prices and particulars, indicating your needs.*

## TERMS AND INFORMATION

### TERMS:

Cash with order. Prices F. O. B. Portland.

To guarantee the reservation of stock for future fall or spring delivery, one-fourth of the purchase price should accompany the order. No order will be booked without a deposit of 25 per cent. Cash in full must accompany foreign shipments.

C. O. D. orders must be accompanied by one-fourth cash before shipment can be made.

Positively no order for rooted cuttings or lining out stock will be accepted for less than 25 plants of the same size and variety.

Prices quoted in the 10, 100, or 1000 lots apply to one size and one variety only.

We reserve the right to substitute grades when necessary and the difference is not too great.

### PACKING:

No packing charge will be made when the method of packing is left to our judgment.

Many small balled grades can be safely shipped, packed bare roots in moss and cut down shipping costs.

### RESPONSIBILITY:

All the stock offered by this Company is grown out of doors and in their own fields with the greatest care and packed in like manner and we make no guarantee, either expressed or implied that the plants will grow or give specific results. Upon proper proof, any plants untrue will be replaced, or any miscounted will be corrected. It is mutually agreed that our responsibility is limited to the original price paid. Complaints must be made within 5 days after receipt of plants. All shipments are at the risk of purchaser after being delivered in good condition to the carrier.

### SHIPPING DIRECTIONS:

Give explicit directions stating whether stock is to be shipped by rail or auto freight, parcel post or express. In the absence of advice we use our best judgment.

### NOTE:

We accept all orders upon condition that they shall be void should frost, storm or other unavoidable cause result in injury or destruction of stock.

**SHERWOOD NURSERY COMPANY**  
141 S. E. 65th Ave., Portland, Oregon

### TO REACH NURSERY:

Drive east on East Stark Street highway to Southeast 72nd Avenue.

OR, drive east on East Burnside to Southeast 73rd Avenue.

Nursery is reached in a fifteen minute drive from the center of city by either one of these two main highways leading eastward.

# GENERAL LIST

Including Conifers and Broad Leaved Evergreens, Deciduous Shrubs and Rock Plants.

## **Abelia grandiflora (Glossy Abelia)**

Foliage glossy green, flowers white with pink blush. A beautiful, hardy evergreen. Splendid for foundation and mass plantings. Blooms all summer and is an attractive shrub both in flower and foliage.

## **Abelia grandiflora sherwoodi (Sherwood Dwarf Abelia)**

A dwarf abelia, not only the plant but the leaves and the flowers as well being about half the size of grandiflora. Flowers pink and white, same as grandiflora. Thick-branching and very compact. A choice little plant, especially where space is a factor, supplying a long felt need. Originated by us and has proven such a favorite that up to the present time we have been unable to supply the demand.

## **Andromeda—See Pieris**

## **Araucaria bidwilli (Bunya-Bunya)**

A tree, native of Australia. The needles grow in two rows along the stem, are lance-shaped, flat, very sharp pointed, and attain a length of  $\frac{3}{4}$  to  $1\frac{1}{2}$  inches. It has the most glossy foliage of any conifer with which we are familiar. Especially good for large plantings. Hardy.

Rooted cuttings, not transplanted.....		.....	.....	7	53
--	--	-------	-------	---	----

## **Arborvitae—See Thuja and Thujopsis**

## **Arbutus menziesii (Madrona)**

Strong growing tree with thick, large, glossy evergreen leaves, and a smooth bark, reddish brown in color near the base of the tree and shading off into a light creamy brown and olive in the upper limbs. Has fragrant white blossoms in the spring and clusters of bright red berries in the fall, both of which add much to the other appealing features of the tree.

Rooted cuttings, not transplanted.....		.....	.....	7	53
--	--	-------	-------	---	----

**Arbutus unedo** (Strawberry Tree)

A spreading shrub with rich, evergreen foliage. Has many charming, pearly-white, bell-shaped flowers, followed in the fall by brilliant red strawberry-like fruits. Does well in sun or partial shade, and is drought resistant.

	Each	10	100	1000
Rooted cuttings, not transplanted.....	\$ .....	\$ .....	\$ 6	\$ 45

**Arctostaphylos columbiana** (Manzanita)

A shrub of rounded type of growth, attaining a height of four to five feet. Unique and picturesque. Has rather small, round, thick leaves of grayish silver tone, and reddish brown bark that scales off in flakes. A hardy, rugged little mountain shrub that is just different. The flowers, which grow in nodding clusters, are white and pink. Native of the Cascades.

Rooted cuttings, not transplanted.....	.....	.....	6	45
--	-------	-------	---	----

**Arctostaphylos nevadensis** (Dwarf Manzanita)

A low-growing, broad leaf evergreen, 18 to 24 inches tall, with an interesting spreading habit of growth. The leaves, which have a delightful appearance of freshness, are about the size of a quarter of a dollar and almost as round. Is most impressive when grown in masses as it grows on our Oregon mountain slopes, where it is native. Retains its refreshing greenness under exceedingly dry and trying conditions.

Rooted cuttings, not transplanted.....	.....	.....	6	45
--	-------	-------	---	----

**Arctostaphylos uva-ursi** (Kinnikinnick)

Sometimes called Bear Berry. A lovely low trailing evergreen, flourishing in a wide range of latitude and altitude. In Oregon it is at home from the splash of the waves of the Pacific to timberline in the Cascade mountains. Withstands almost any degree of cold. Has large brilliant red berries, roundish glossy leaves and grows in thick masses, completely covering the ground, rocks, walks or old logs over which it trails. Exempt from pests, good the year round and in every respect decidedly pleasing and satisfying. Considered by some to be the best ground cover known.

Rooted cuttings, not transplanted.....	.....	.....	5	38
2- 4 inches once transplanted.....	.....	.....	6	45
4- 6 " " "	.....	.....	7	53

**Aucuba japonica variegata** (Golddust Aucuba)

Leaves large, glossy, dark green splashed with gold. Hardy and resistant to smoke and dust. The variegated foliage gives this plant a bright cheerful aspect and since it thrives best in deep shade it is a most useful evergreen, for brightening dark, shady corners difficult to landscape. Grows five to six feet tall.

10-12 " " " "	B&B	.30	2.75	23
12-15 " " " "	B&B	.35	3.25	26

The 8-10", 10-12" and 12-15" grades can be shipped in bunches of ten, packed in moss to reduce transportation cost.

**Aucuba japonica (Pollenizers)**

Golddust Aucuba seldom bears berries unless pollenizers are planted with them. Since the large red berries are one of the attractive features of the Aucuba, we are offering the pollenizers.

				750

Azalea mollis, or Chinese Azalea, is one of the hardiest and one of the best of shrubs, and can be used to advantage almost anywhere that soil conditions are favorable. It is most effective planted in masses. Our plants are symmetrical and heavily loaded with flower buds.

**Azalea occidentalis (Western Azalea)**

Native of Oregon. Tall, strong growing shrub, reaching a height of 6 feet or more and spread of the same. Blooms profusely in the spring with deliciously fragrant, white, pink-tinted flowers. Is one of the attractions of the coastal highways of Oregon in the blossoming season.

	Each	10	100	1000
Rooted cuttings, not transplanted.....	\$ .....	\$ .....	\$ 6	\$ .....

**Azalea schlippenbachi (Royal Azalea)**

Slow growing. Has broad, green foliage, especially attractive in the bronze shade of the new growth. Flowers are varying shades of pink and are immense in size, being three inches across. Thrives best in partial shade, and for this reason fills a need among deciduous azaleas.

**Azalea sherwoodi (Sherwood Orchid Azalea)**

This is a hybrid hinodegiri and our own introduction. The flowers are a fascinating and beautiful orchid in color. It has been awarded a prize in a rare plant exhibit. We have been developing and trying it out for several years in our nursery where it has attracted much attention from visitors. Foliage about the size and gloss of the Hinodegiri Crimson Azalea, hardy anywhere the hinodegiri is hardy, a profuse bloomer, blooms completely covering the plant, and are large for a dwarf azalea. Flowers are a clear lavender with a speckled throat. This azalea fills a need which has not been met by any other azalea. Although showy it harmonizes with other colors in the garden.

***Calluna vulgaris rubra* (Red Heather)**

The Red Heather is new and may still be considered a rare plant. When in bloom there is nothing visible but the blossoms, which are a rich, purplish-red. It is such a brilliant display of flowering beauty in mid-summer that visitors to our nursery from far and near have been amazed at its superb beauty and have been unstinted in their praise. It is hardy and grows about eighteen inches tall. As in the case of the Darley Heath and Irish Bell Heather, we cannot say too much for this matchless gem of the garden. Its blooms are especially welcome, coming at a season when there is but little competition in blossoming shrubs.

--	--	-------	-------	---	-------

**Ceanothus prostratus (Mahala Mat or Squaw's Carpet, "Mahala" being one of the North American Indian names for squaw.)**

A new broad leaf evergreen for the garden. Low and trailing, leaves resemble small holly in shape, in fact it could easily be mistaken for a creeping holly. Covers the ground with a solid mat or carpet as the name signifies, trailing beautifully about and over stones, stumps or old logs. Thrives in dry, exposed and rocky situations. Hardy in the mountains of Oregon where it is native. While the foliage is most attractive, an outstanding beauty lies in its bright blue blossoms which have tiny points of gold, and with which it is covered in the spring. Another gem which is certain to find its way into every well ordered garden or planting. Has been thought by some to be the most beautiful of all low trailers.

Rooted cuttings, not transplanted.....		.....	.....	10	75
--	--	-------	-------	----	----

**Ceanothus velutinus (Sticky Laurel)**

A very hardy broad leaf evergreen, attaining a height of about 6 feet and a spread of 12 feet. Has leaves of medium size and a bright green foliage which possesses a strong aromatic odor. Thrives in a dry rocky soil and in hot or cold exposures. Has soft white blossoms at the ends of the stems. Adds variety of foliage.

Rooted cuttings, not transplanted.....		.....	.....	6	45

**Chamaecyparis lawsoniana grandi**

A low flat pyramid, having wonderful green foliage of unusual density. Naturally of shapely form and needing no pruning. Grows to a height of 6 to 8 feet and has a spread considerably broader.

Very desirable where neatness and perfection are desired.

Rooted cuttings, not transplanted			.....	.....	6	45
-----------------------------------	--	--	-------	-------	---	----

***Chamaecyparis lawsoniana lutea* (Golden Lawson Cypress)**

Dense golden cypress. The foliage is very heavy, while the tree itself is a broad symmetrical pyramid, branching close to the ground. A trim, handsome ornamental, giving the impression of an individual well dressed and groomed, and with a minimum amount of attention. Golden color throughout the year. Resembles Westermann Cypress. Height 6 to 8 feet.

The improved brooms, which are of both American and English origination, are among the most popular of recent introductions in the garden. For rich, gorgeous coloring and varying shades and tints in the different varieties they have no equal. Among the flowers may be found white, purple, crimson, orange, yellow, bronze, cream, mahogany, pink or combinations of these that are unsurpassed. In habit of growth they range from low trailers to tall upright types. Some of them will withstand a low degree of temperature and all will grow under adverse conditions and thrive under more neglect than most shrubs. They should be included in practically all plantings. We call attention to our fine list. They are classified in this list under both *Cytisus* and *Genista*.

***Cytisus scoparius*****CALIFORNIA—**

**Daphne cneorum** (Rose Daphne) (Rock Daphne)

Probably the most delightfully fragrant of all flowering evergreens. Blooms in the spring and again in the fall. The flowers, which are pink, appear in great profusion. The plant is dwarf and well adapted to rockery, and other plantings. A little dwarf of superior merit.

**Desmodium**—See **Lespedeza****Dianthus caesius** (Cheddar Pink)

Evergreen rock plant growing into a low compact mound of blue gray foliage, completely covered with rosy pink flowers on 6 inch stems. Spring blooming. Neat, hardy, and a great favorite.

1- 2 inch clumps.....	----	----	6	45
2- 4 " " "	----	----	8	60

**Draba olympica** (Whitlowgrass)

Dainty evergreen rock plant, growing in low, mossy, symmetrical mounds, covered in spring with a blanket of yellow flowers. Words fail to describe the beauty of this gem from the high Olympic mountains. Without doubt, the most beautiful, miniature evergreen we know.

1- 2 inch clumps.....	----	----	8	60
-----------------------	------	------	---	----

**Erica carnea rosea** (Spring Heath)

Like the Darley Heath, but has a shorter blossoming season, the flowering season being limited to the spring instead of both winter and spring. The shorter blossoming season is very largely made up in the superior beauty of its abundance of fine, pink flowers.

1- 2 inches once transplanted.....	----	----	5	.....
2- 4 " " "	----	----	6	.....
4- 6 " " "	----	----	7	.....

**Erica mediterranea hybrida** (Darley Heath) (Also called Hybrid Heath, Christmas Heath or Winter Heather)

This is one of the most attractive and desirable plants grown in our nursery. It is hardy and dwarf, seldom reaching more than one foot in height. It has a beautiful, dense dark green foliage and from early winter to spring is covered with such a profusion of lovely, purplish blossoms that the foliage is practically obscured. It is not unusual to see this brave little plant blossoming through the snow. Being a winter bloomer, hardy, equally good for rockeries, borders, groups and masses, it should be included in every planting.

***Ilex aquifolium* (French Type of English Holly)**

A large holly of thrifty growth. Full branches, has large, rich green leaves and bears bright red berries of large size in abundance. One of the best of hollies, and a holly which one would make no mistake in planting where holly thrives or is desired. Very valuable both for ornamentation and for commercial use where the foliage and berries are wanted for Christmas or other decorations. The best commercial strain having good keeping qualities and heavy berries. Self-fertile.

Rooted cuttings, not transplanted..... ----- 10 75

***Ilex aquifolium albo-marginata* (Silveredge Holly)**

Popular variegated form of *Ilex aquifolium*. When closely pruned, it is well adapted to formal plantings. Berry-bearing type.

**Kalmiopsis leachiana (Kalmiopsis)**

Here is something new for the gardens. Undoubtedly one of the rarest and one of the finest of small, broad leaf evergreens. Believed to be one of the few hold overs of the plants of the glacial period, seemingly a remnant of ancient plant life, and found only in a very limited area in the mountains of Oregon. The leaves are medium-small and glossy. Foliage which is full is a deep, healthy green. Plants grow to a height of 1 to 2 feet and are covered with bright red and pink blossoms in the spring. In every respect a most delightful little shrub, among the choicest of the choice, and one which every plant lover will desire to possess. Hardy.

**Taxus baccata procumbens** (Prostrate English Yew)

One of the beautiful prostrate types, being of broad vase-shaped form of growth, low and heavily branched. Has a deep green foliage.

Is a strong vigorous grower, and of far more than ordinary attractive appearance. Occupies a valuable place in landscaping where low growers are desired because of its commanding form and color. Does equally well in sun or shade. Rare.

***Teucrium chamaedrys* (Chamaedrys Germander)**

A beautiful evergreen rock plant somewhat resembling heather. It reaches a height of about one foot with a spread of three feet, and is a bouquet of pink bloom all summer. Extremely hardy, holding its bright, glossy green color in the coldest weather. Has a fragrant foliage, and will add beauty wherever low blossoming plants are desired. Almost without peer as a rockery or border plant. A marvelous ground cover. Very rare. Drought resistant, and takes the place of Heather in hot, dry sections. Good results can be obtained only by shearing immediately after blooming.

***Thuja occidentalis decussata***

A blue-green arborvitae, having a soft, dense, feathery foliage. Pyramidal in form and adds effective variety in tree grouping.

Rooted cuttings, not transplanted		.....	.....	6	.....
-----------------------------------	--	-------	-------	---	-------

***Thuja occidentalis ericoides* (Heath Retinospora)**

A very dense dwarf conifer seldom attaining a height of more than three or four feet. Has a soft foliage and is perfectly hardy in the northern states. Its seasonal changes of color are fine, particularly in the winter season when it takes on an unusual and delightful violet hue. Equally good for specimen or mass plantings, and for rockeries, borders and edgings it has few peers. We cannot say too much for this gem of rock and garden.

***Thuja occidentalis nana* (Little Globe Arborvitae)**

A dwarf of regular form. Foliage upright and grows in thick, heavy layers appearing to be packed together, and of good bright green color. Low growing, a mature tree reaching a height of two feet and spread of three feet, and presents an aged appearance. Desirable wherever dwarfs are needed.

Rooted cuttings, not transplanted		.....	.....	6	45
-----------------------------------	--	-------	-------	---	----

***Thuja occidentalis pyramidalis* (American Pyramidal Arborvitae)**

A most desirable arborvitae of narrow columnar growth, dense and compact without trimming. Very hardy and a favorite in almost any planting. Planted in groups it produces a most impressive alpine effect. In situations where effective hedges are desired requiring but little space, Pyramidal Arborvitae has no counterpart. The hedge becomes a solid wall of green from four to twenty feet in height and occupies no more than two feet in width. For hedges, trees should be planted one and one-half feet apart. No pruning is needed other than topping. A Pyramidal Arborvitae hedge requires scarcely any care.

***Thuja occidentalis texana glauca* (Blue Arborvitae)**

A tree of rapid growth. Has a heavy, soft blue-green foliage of delicate, pleasing texture. Color the same all seasons of the year. Of general pyramidal form and very hardy. Lends itself well to shearing and is fine for hedges. Would add variety and color to landscaping effects. The beautiful, blue-green, feathery foliage of this tree, together with its graceful habit of growth should make it a universal favorite. Tree of medium height.

***Thymus nummularius***

Fragrant, evergreen mat, rose flowers, mid summer.

6- 8 inch spread.....	.....	.....	8	60
-----------------------	-------	-------	---	----

Thyme is gaining in favor as a substitute for grass in lawns. For such use it has several distinct advantages as follows: It does not require mowing, just a clipping or rolling once or twice a year; it helps greatly in weed control where used, occupying the ground so completely that dandelions and other obnoxious weeds are mostly choked out; it forms a beautiful edge, creeping in around the shrubbery so that expensive and laborious edging is unnecessary; it has a delightful fragrance and attractive mats of bloom in crimson, purple and the like in season, adding beauty and variety to the surroundings; it is easier to maintain on steep slopes and terraces than grass; it requires much less watering than the ordinary lawn. In short it makes a solid carpet of pleasing growth which will last indefinitely, and with good variation according to the variety used. For lawn purposes plants should be set from 12 to 18 inches apart each way. In from one to two years the plantings will be a solid carpet. For this use we have made our prices extremely low. The following four varieties of serpyllum are best. All are hardy.

## **Thymus serpyllum album** (White Thyme)

Evergreen carpet plant, white flowers.	Each	10	100	1000
4- 6 inch spread.....	\$ .....	\$ .....	\$ 6	\$ .....

## **Thymus serphyllum carneus** (Pink Thyme)

Like preceding variety, but with lavender pink flowers.

6x6 inch spread..... 7 .....

## Thymus serpyllum coccineus (Crimson Thyme)

Dense evergreen carpet, completely covered in spring with crimson flowers, making a solid mat of red. A marvelous plant.

4- 6 inch spread.....	.....	5	38
6- 8 " "	.....	6	45

## **Thymus serpyllum lanuginosus** (Woolly Thyme)

Fragrant, gray-green mats, lavender pink flowers. Has a frosty, refreshing appearance. Growing over rocks it gives the appearance of flowing water.

6x6 inch spread..... 7 53

***Umbellularia californica*** (California Laurel). Also commonly known as Oregon Myrtle.

Hardy evergreen, compact, leaves broad, dark green, flowers white.

Foliage has strong, pungent, spicy fragrance. One of the beautiful native shrubs, found along the Pacific Coast. Each 10

## **Vaccinium ovatum (Evergreen Huckleberry)**

First discovered by the Lewis and Clark expedition at the mouth of the Columbia river in 1805. One of the great beauties of the plant is the thick, waxy leaves, of blended shades of green in spring and summer, and changing to a mixture of deep crimson and bronze in fall and winter. It is a rounded plant, many branched and of unusual density. Strong, vigorous grower, and stands unlimited shearing. Can be sheared into a hedge from 1 to 5 feet tall. Does well in either sun or shade, but is at its best in sunny exposures. An evergreen shrub of surpassing merit and probably the finest of all hedge plants. Each 10

**Veronica hecknori**

A very unusual evergreen with russet green foliage in summer turning to a rich golden color in the winter season. The growth appears in the form of a multitude of symmetrical upright golden spikes, attaining a height of 12 to 15 inches. Makes a fascinating border or low edging plant, and could be used to advantage as a part of almost any low planting. It is a unique type. Hardy.

**Viburnum tinus lucidum (Shining Laurustinus)**

This, like most viburnums has good foliage. The leaves are evergreen, large and glossy. Strong grower. Large flower clusters in great profusion. Decidedly a superior variety.

Rooted cuttings, not transplanted..... ..... ..... 7 53

**Whitlowgrass—See Draba****Wintercreeper—See Euonymus****Xerophyllum tenax (Pine Lily, Bear Grass, Squaw Grass, or Indian Basket Grass)**

A native of the Cascade and Rocky moutains. Grows into a graceful symmetrical bunch in weeping form and might be described as a low fountain in grass, about eighteen inches high and two to three feet across. Out of the center of this grassy bunch grow the tall stems three to five feet in height and from one to as many as twenty in number, crowned with the long creamy-white lily heads of matchless beauty. The leaves which are grass-like are evergreen, and unusual as it may seem, it is an evergreen belonging to the lily family. Mountain slopes and meadows, clad in fields of these lilies are a thrilling picture, which once seen will never be forgotten. The grass is said to have been used by the squaws in early days in weaving baskets. Perfectly hardy, rather slow growing but long-lived. Should be planted in groups, and in the open where it is partially shaded during the day for best results. Will not bloom well if too shaded. The fine bunches of long, silky grass are very ornamental when the lily is not in bloom. A plant with a future, and rare in American gardens.
